Sparkling

Champaign comes from the Champaign region in France of the same name. If it does not come from Champaign France, it is considered a sparkling wine. Sparkling wine is like regular stable wine, except it is carbonated. To make a champaign or sparkling wine, the wine is placed in a giant vat with yeast. The second fermentation is what creates the bubbles, and then the sparkling wine is bottled. All champaign or sparkling wine have "traditional" method or "Champaign" method on the label is made this way.

Rose

Red grapes are crushed and only brief contact is allowed between the skins and the juice. It is the degree of the contact between the skins and the juice that determines the final color of the wine. Thus rosé wines lack both the deep color and the tannic structure of red wines made from the same grape varieties, and in this sense are more like white wines, and are best served very cold. It is also rare to find rose wines subjected to oak treatment.
